

# Canaveral Moonstone

## Presidents Corner

Remember, Feb 14 is a special day to send valentines to special friends. I wish all of our CMGS members a happy valentines day.

We have received our first order of our Parade of Gems "Rack Cards". They are in the "Cabbing" room. I know we are still 9 months away, but take a few and offer some to your favorite Parade of Gems dealers when you attend a show. They share them with their good repeat customers.

The Rocks, Gems and Jewelry Show by the Central Brevard Rock & Gem Club, at the Kiwanis Island Recreation Center, is held the first week end of February. It is always Great!

Feb 8, 9 & 10, the Frank Cox Gem, Jewelry, Bead Show and Sale will be at the Melbourne Auditorium. He has offered CMGS 2 tables if we want to take advantage of the space to boost our Parade of Gems. If any one is available to participate, please give me a call.

Feb 16 & 17, The Treasure Coast Rock & Gem Society Show will be held at the Vero beach Community Center. It is always worth the short trip to Vero to enjoy their presentation.

Remember, at the March meeting we will have the drawing for the 2 CMGS Members "scholarships" to William Holland or Wild Acres. You have an entry for each meeting you have attended this past 12 months. (Dues for 2019 must have been paid to qualify).

Don

**Exchange Bulletins are Welcome**

**(All material may be copied unless otherwise noted if credit is given)**

**The Dead Line for the Maarch Moonstone is February 20, 2019**

**The URL for CMGS web site is: <http://www.canaveral-mgs.com/>**

The **Canaveral Mineral and Gem Society (CM&GS)** is a registered Florida not-profit-corporation approved by the Internal Revenue Service as a tax exempt , organization under Internal Revenue Code section of Florida 501 (c) (7) for the following purposes:

1. For the preservation, support, and promotion of the hobby of Mineralogy and its various forms of allied activities and earth sciences.
2. To dedicate ourselves to the furtherance of the hobby through the exchange of knowledge, experience, and other helpful information among ourselves and other like organizations.
3. To further the education of members and the general public of the hobby by programming talks, discussions, motion pictures, field trips, and the staging of shows and exhibitions.
4. To maintain an active affiliation with the Southeast Federation of Mineralogical Societies and to participate in Federation activities to the fullest extent possible.

### **Goals and Objectives**

5. To promote the spirit of cooperation and fellowship among the membership.
6. To increase our knowledge of rocks and minerals and to explore the mystery and wonder of the earth.
7. To actively encourage members to attend educational classes, workshops, lectures, and demonstrations.
8. To stimulate interest in the earth sciences within the community by providing scholarships to worthy students at all educational levels.
9. To provide the necessary equipment and resources to enable members to develop their interests.
10. To enjoy our hobby and Have Fun!

### **Affiliations**

The Canaveral Mineral and Gem Society is a member of the Southeast Federation of Mineralogical Societies (SFMS) and the American Federation of Mineralogical Societies (AFMS)

### **Meetings and Dues**

Meetings are the First Wednesday of each month at the Henegar Center, 625 E. New Haven Ave., Melbourne, Florida. Meetings start at 7:00 p.m. Visitors are always welcome! Dues are \$20.00. Junior Member dues are \$2.00.

## Website News By Sharon Jones

In an effort to boost our membership and our attendance at the Parade of Gems, we are going to be putting quite a bit of information, both informative and fun jokes about rocks on our Facebook page, <https://www.facebook.com/Canaveralmgs/> . **If you use Facebook**, we need your help!

1. Please go to the Canaveral Gem and Mineral Facebook page and **click like** on the page not just the individual post.
2. Please do a **review** of Canaveral Gem and Mineral (Review is one of the links just below the top graphic) this helps people understand how great the club is.
3. Know any good rock jokes?? Let me have them!
4. If you're an avid Facebook user, we will need extra help to keep up with our efforts. Please talk to me at the meeting or email me @ [webiecmgs@gmail.com](mailto:webiecmgs@gmail.com) .

### On our website <https://www.canaveral-mgs.com>

1. You can always find the latest newsletter (& two years back).
2. in the Members Only portion you'll find the members phone listing, our upcoming events...like the Rock Swap next month, etc.

Speaking of THE ROCK SWAP - WE NEED YOU! See Mark Heathman or email [webiecmgs@gmail.com](mailto:webiecmgs@gmail.com) Sat. March 23 Wickham Park, 9:30 - 3

1. Help with setup & check-in at Wickham Park. Must arrive at 8:15. Well need to ck vendors in and they might welcome help setting their things out. Won't take long & its a great way to grab the best items for yourself. LOL
2. Help with tear down & cleanup. Must arrive by 2:30. In order to get our deposit back the area will need to be free of any trash. Vendors might also welcome help getting things packed up.

## January Business Report - January 2, 2019

The meeting was called to order by President Don McLamb on January 2, 2019 at 7:10 pm. Parade of gems planning meeting will be held in about 2 weeks. Don will send an agenda out if you're interested in attending, let him know. Dolly's Picnic is scheduled for Sunday, April 7<sup>th</sup>. The Rock Swap will be held March 23<sup>rd</sup> at Wickham Park about 9- 3pm. \$10 to set up to sell items.

Make sure you sign in at meetings. Kathy puts your name in drawing for William Holland and at the March meeting we will pick a lucky winner.

Nancy, our Vice President, is sick tonight so there will be no presentation tonight.

The December minutes were approved and accepted.

Our treasurer, Liz, has been working on deposits and payments from the Parade of Gems. She turned in the treasurer report.

Membership is now up to 166 members. Dues for 2019 is now due. If you have not renewed please pay Kathy the \$20 membership dues.

Sue and Sara are working on the library. If you have any books or magazines that belong to the library, please bring them back. If you have any donations, now is a great time to help our library.

Some new classes were announced: Roy will be teaching a chain mail class beginning in January. Meeting on Tuesday and Thursdays for 2 weeks beginning January 8<sup>th</sup>. Haydee's beading class will be beginning on February 5. Dave Jacobson and Sharon Jones will be teaching Silversmithing sometime in February. Mark Heathman will also be teaching faceting sometime in February.

Don welcomed 6 new visitors. Some of the visitors are new to the area and others are newly retired and are looking to explore different interests.

Shannon read her article, "What makes a club a good club?" She also commented that participation of other people for different activities in the club would be very appreciated and helps everyone to enjoy the club more.

Dave Jacobson spoke about diamonds, the Mineral of the Month. Of course, one of my favorite minerals. Dave asked if anyone had ever been to the Crater of Diamonds State Park in Arkansas. It sounds like a fun place to go.

Melissa has been experimenting with her die cut machine, a Cricut, to get different patterns on stones. She has also been practicing setting square stones without cutting corners.

Art showed a lovely pendant and earrings out of scrap silver. Mark Heathman worked over the holidays on setting amazing stone pendants including opals, chrysocolla, larimar and many others. Haydee brought beautiful intricate beading samples that she will be teaching in February. She will begin with the herringbone pattern.

Our club provides scholarships to students working in various Earth Science and Geology fields. We're hoping to send money for four scholarships for \$600 each to FAU. Bob Denaberg is going to contact FAU. One of the requirements for the scholarship is that they give a presentation to our club.

Mary Kinberg  
Secretary

## Mineral of the Month—Native Silver

By Dave Jacobson

This month we will take a look at one of the native elements, silver, Ag. Native silver is rare and it is a minor source of silver ore. Most silver produced is from silver bearing ores. Some silver bearing minerals are acanthite, proustite, cobaltite, galena, copper zeolites and quartz. In addition to being used in the fabrication of jewelry it has many industrial uses. One of the largest uses of silver is in the manufacture of photographic film although I suspect the rise in digital photography has to have a large impact on this market. Silver's use in photography is due to its reactivity to light. Silver is also the best conductor of heat and electricity although its cost makes it impractical to use for wiring. Silver was one of the first metals to be used for coinage. The Lydian's made coins from electrum, an alloy of silver and gold as early as 700BCE.

Most silver produced is found with other metal ores such as copper, copper-nickel, gold, lead & lead zinc. Major producers of silver are Canada, Mexico, Peru, Australia and the United States. Mexico is reported to be one of the largest silver producers.

Silver has several properties in addition to its color and ability to take a good polish which make it excellent for jewelry work. One is silver's ductility, the ability of the metal to be drawn into wire or rolled into thin sheets. It is also malleable, which means it is capable of being formed by hammering or pressing. It is also sectile, which means it is capable of being sawed or severed smoothly. Another thing is cost, even though the spot price has been hovering around \$15.00 an ounce is not out of range for most hobbyists to fabricate jewelry from a precious metal.

Native silver is in the isometric crystal system. Cube shaped or octahedral crystals are rare. Typical forms are compact masses, plates, wire like forms and dendrite like shapes. Color is silver white or gray although many specimens appear black due to tarnishing. It has no cleavage. Streak is silver white. Hardness is 2.5 to 3. Specific Gravity ranges 10 to 12 depending on the purity of the specimen.

Silver takes its name from the Anglo-Saxon *seolfor*. The world in the Old High German is *silabar*. The symbol for silver, Ag is from the Latin *argentium*.

I used the following reference materials in preparing this article:

*A Field Guide to Rocks And Minerals* by Frederick H. Pough.

*Mineralogy For Amateurs* by John Sinkankus.

Simon & Schuster's *Guide to Rocks And Minerals*.

*Amethyst Galleries Mineral Gallery* on the Internet at <http://mineral.galleries.com>.

*Rocks And Minerals* by Chris Pellent

## Bench Tips

by Brad Smith

Learn New Jewelry Skills With Brad's "How To Do It" Books

[Amazon.com/author/bradfordsmith](https://www.amazon.com/author/bradfordsmith)

### PROTECTING FINISHED SURFACES

I figure that any accidental scratch I make on a piece means about 15 minutes of extra sanding and polishing. So after finishing major surfaces I typically cover them with some masking tape to avoid any scratches when doing final work like cleanups and setting of stones. The blue masking tape used by painters works particularly well because it doesn't leave a sticky residue.

### PICKLE PRECAUTIONS

A hot pickle pot gives off fumes that bother me in my home workshop. I get around that by using my pickle cold. I mix it a little stronger than for a hot pot so that it works almost as quickly. I keep it in a large-mouth plastic bottle and cap it off whenever I'm done using it.

Upcoming Gem and Mineral shows**February 2019**

**2-3—MERRITT ISLAND, FLORIDA:** Annual show; Central Brevard Rock and Gem Club; Kiwanis Recreation Center, 951 Kiwanis Island Park Rd; Sat. 10-5, Sun. 10-4; \$5, \$1 off coupon in Florida Today or website (centralfloridagems.org), free for kids under 12 when accompanied by a paying adult; will include more than 20 vendors selling hand made and finished jewelry, rocks, minerals, slabs, gemstones, and gem trees, sluice and spinning wheels, a silent auction, door prizes and a grand prize, and faceting and capping demonstrations.; contact Rosalind Mestre, 1867 Longleaf Rd, Cocoa, FL 32926-6449, (321) 431-0159; Email: roz.mestre@att.net

**8-10—MELBOURNE, FLORIDA:** Annual show; Frank Cox Productions; Melbourne Auditorium, 625 E. Hibiscus Blvd.; daily 10-5; \$5 / \$4 if you mention this listing; show and sale of gems, jewelry, crystals, minerals, fossils and beads.; contact Frank Cox, 755 S. Palm Ave. #203, Sarasota, FL 34236, (941) 954-0202; Email: frankcox@comcast.net; Website: <http://www.frankcoxproductions.com>

**15-17—SARASOTA, FLORIDA:** Show and sale; Frank Cox Productions; Sarasota Municipal Auditorium, 801 N. Tamiami (U.S. 41); daily 10-5; \$5.00 / \$4.00 if you mention this listing.; show and sale of gems, jewelry, crystals, minerals and beads; contact Frank Cox Productions, 755 S. Palm Ave. #203, Sarasota, FL 34236, (941) 954-02; Email: frankcox@comcast.net; Website: <http://www.frankcoxproductions.com>

**23-23—LAKELAND, FLORIDA:** Annual show; Bone Valley Gem, Mineral & Fossil Soc.; First Presbyterian Church, 175 Lake Hollingsworth Dr.; Sat. 9-4:30; \$3, free admission for students, small children, and teachers; vendors offering rocks, minerals, fossils, and jewelry; demonstrations; displays, and activities for children; contact Kim Price, P.O. Box 90631, Lakeland, FL 33804, (863) 412-9156; Email: lbvgmfs@gmail.com; Website: Bonevalley. Net

**March 2019**

**1-3—LARGO, FLORIDA:** Annual show; Suncoast Gem and Mineral Society (SGAMS); Minnreg Hall, 6340 126th Ave. N.; Fri. 10-6, Sat. 10-6, Sun. 10-5; \$5 donation for adults and \$4 for students good for all three days, free admission for children under 6, save \$1 by presenting flier, military ID, or an ad from the Tampa Bay Times or website; 49th annual show and sale featuring finished and rough gems presented by dealers and SGAMS members, also on offer is jewelry, beads, minerals and tools; additional highlights include a grand prize drawing, silent auction, member display cases, demonstrators, gem mining and grab bags; contact Bill Schmidt, Suncoast Gem and Mineral Society, P.O. Box 13254, St Petersburg, FL 33733-3254; Email: SGAMS-gemshow@gmail.com; Website: [www.sgams.com](http://www.sgams.com)

**If you know of a show that is not on this list, please send me the information at shannon-b787@gmail.com.**

## 2nd Annual CM&GS Rock Swap on March 23, 2019

### at Wickham Park.

The rock swap will be held at Pavilion #4 on the east side of the second (north) lake at Wickham park just past the dog play area.

The public is invited, entrance is free. All vendors must pay a \$10 fee to cover expenses. The first 14 vendors can make a reservation for an 8 foot picnic table under the pavilion shelter. Other vendors can tailgate or use the parking and grass areas.

The rock swap will run from 9:30AM - 3:00PM. Vendors can begin setting up at 8:30AM.

Contact Mark Heathman at 321-474-1406 to make a reservation.

## February Meeting Presentation

At our 6 February 2019 meeting we will have a lecture on Oregon sunstone and gemstone marketing in Thailand. A second topic is mathematical computer art and a prototype concept to marry art with gemstones. Although these topics seem disconnected, the lecturer (Mr. Frank Milordi) will briefly discuss the technical/business areas that are of common interest.

Mr. Frank Milordi is a retired Northrop Grumman Director of Engineering and Technology. After his 2008 retirement, Frank was looking for “things” to keep him busy during retirement. Frank decided to expand his mathematical computer art (based on fractals) and aggressively pursue gemstones.

The gemstone adventure will cover Frank’s evolution from gemstone neophyte to eBay bidder to wholesale buyer (in conjunction with Thailand partner) to wholesale marketer of Oregon sunstone gemstones in Thailand! The confidence in Oregon sunstone was reinforced in 2013 by Gemological Institute of America (GIA). <http://www.gia.edu/gems-gemology/FA13-oregon-sunstone-pay>

The discussion on Oregon sunstone will highlight faceting requirements and the financial considerations when you balance the quality/cost of sunstone rough, faceting yield/cost and overhead costs that eventually defines a dollar cost per finished carat! Samples of Oregon sunstone rough and faceted Oregon sunstone gemstones will be available for viewing.

# March Meeting Presentation

## Renée Newman's Colorful Books on Gems & Jewelry

Used throughout the world as consumer guides, sales training tools, gemology course texts and references for jewelers, buyers and appraisers

**Diamond Handbook: A Practical Guide to Diamond Evaluation, 3rd Edition NEW**  
 Using close-up photos, it expands on the information in the *Diamond Ring Buying Guide* and covers additional topics such as diamond grading certificates, light performance, fancy colored diamonds, new cut grading systems, branded diamonds, diamond recutting, antique diamonds & jewelry, and diamond fluorescence. The *Diamond Handbook* is geared to trade professionals, serious diamond buyers, gemology students and people who want more information than what's on the Internet and in the *Diamond Ring Buying Guide*.

\$19.95 ISBN [978-0-929975-39-9](#) [See details and reviews](#) [Buy now](#)

**Pearl Buying Guide: How to Identify & Evaluate Pearls, 6th Edition, NEW**  
 A comprehensive guide to evaluating, identifying, selecting and caring for pearls and pearl jewelry. Offers information and color photos on Akoya, South Sea, freshwater, Tahitian, Sea of Cortez, abalone, conch, clam, scallop, melo, quahog, keshi, mabe, natural and imitation pearls, treatments, pearl clasps, and necklace styles. This 6th edition has 186 new photos, expanded chapters, and new cultured pearls and pearl jewelry styles.

\$19.95 ISBN [978-0-929975-52-8](#) [See details & reviews](#) [Buy Now](#)

**Gemstone Buying Guide: How to Evaluate, Identify, Select & Care For Colored Gems, Third Edition**  
 A concise yet comprehensive reference about colored gemstones with information on quality evaluation, price comparison, gem identification, cutting styles, treatments, fake stones, optical effects, gem care and geographic sources. There are 323 new color photos and several new gem species and varieties in this updated Third edition. Written for consumers and professionals, the *Gemstone Buying Guide* is a practical, well-illustrated resource for buying, identifying and caring for colored gems.

\$19.95, ISBN [978-0-929975-51-1](#) [See details and reviews](#) [Buy Now](#) NEW July 2016

**Exotic Gems, Volume 4: How to Identify, Evaluate and Select Jade and Abalone Pearls**  
 Explains with color photos the price factors and identifying traits of jade and abalone pearls. Jade is shown shown not only loose but also in jewelry, in the rough and as beads. Fun facts, historical anecdotes, geographic sources, gem treatment information, cutting sequences, advanced identification methods and tips on gem care are included along with diagrams and tables to aid in identification and evaluation.

\$19.95, ISBN [978-0-929975-50-4](#) [See details & Reviews](#) [Buy Now](#)

**Rare Gemstones: How to Identify, Evaluate and Care for Unusual Gems**  
 Provides concise, interesting and practical details on uncommon gems that are now being used by designers to create distinctive jewelry. Besides listing the identification properties of the gems, *Rare Gemstones* tells you where they're found, how they're used, why they're unique, how they're priced, and how to evaluate and care for them. *Rare Gemstones* includes information on their history, treatments, imitations, durability, uses, quality characteristics and pricing.

\$19.95, ISBN [978-0-929975-46-7](#) [See details & reviews](#) [Buy now](#)

**Exotic Gems, Volume 3: How to Identify, Evaluate, Select and Care For Matrix Opal, Fire Agate, Blue Chalcedony, Rubellite, Indicolite, Paraiba and Other Tourmalines**  
 Third in a series of books that explains with color photos the price factors and identifying traits of unusual gems. The stones are shown not only loose but also in jewelry, in the rough and as beads. Fun facts, historical anecdotes, geographic sources, gem treatment information, cutting advice, and tips on gem care are included along with diagrams and tables to aid in identification and evaluation.
